PROFESSIONAL SUMMARY

Software architect and engineering leader with 20+ years of experience and 13+ years directing teams, defining system architecture, and delivering large-scale enterprise SaaS products from concept to production. Deep expertise across the full technology lifecycle — from proof-of-concept design and framework development through CI/CD automation, cloud infrastructure, and multi-environment release management. Track record of building scalable, secure, and cost-effective systems across construction IT, healthcare, e-learning, and enterprise domains.

CORE COMPETENCIES

Engineering Leadership • Software Architecture • Cloud Infrastructure (Azure, AWS) • Full-Stack Development
.NET / ASP.NET Core / C# • Angular / TypeScript • Python • Entity Framework • SQL Server • Docker / Kubernetes
CI/CD Pipelines • Agile/Scrum • Microservices • REST APIs • DevOps • System Design • R&D Management
Healthcare IT (HL7/FHIR) • AI/ML Integration • SaaS Platforms • Multi-tenant Architecture • GDPR Compliance

WORK EXPERIENCE

Jengai LLC — New York, US

Director of Technology & Senior Software Architect | 2023 – 2026

- Led end-to-end engineering for a cloud-native SaaS platform serving commercial construction subcontractors with AI-driven estimation and bid management tools.
- Architected .NET Core / Angular platform on Azure; built Python AI services processing hundreds of construction PDFs, cutting pre-estimation time by 60%+.
- Established CI/CD pipelines via Azure DevOps; integrated Salesforce, Autodesk, and Azure AI services (Document Intelligence, Computer Vision).

Gamyte LLC — New York, US

Director of Technology & Senior Software Architect | 2019 – 2023

- Directed technology strategy and software architecture for the company's product portfolio.

ERC Group Engineering, Consultancy & R&D Services Co.

Senior Software Architect & Group Leader | 2013 – 2019

- Led architecture and delivery of multiple EU-funded international healthcare platforms deployed across 4+ countries (Turkey, Italy, Spain, Portugal).
- Built the Avicenna PDFW Web Framework — a full-stack enterprise development framework adopted across 10+ products, reducing project delivery time by ~40%.
- Designed AHIN healthcare integration middleware enabling interoperability with national eHealth systems across multiple EU members

DataSel Information Systems Co.

Senior Software Architect & Group Leader → Senior Developer | 2011 – 2013

- Architected the Avicenna Case-Mix system deployed in 80+ hospitals nationwide; processed 50M+ clinical records to calculate Turkey's first official DRG costs. Finalist in XI. Technology Awards (TUBITAK/TUSIAD).
- Delivered telemedicine platforms for international clients including Ministry of Interior (KSA) and Eczacıbaşı Healthcare.

Fonet Software Co.

R&D Director → Software Team Leader | 2009 – 2011

- Created the Fonet RAD Framework and Fonet Studio (visual form designer IDE), enabling rapid development of desktop and web healthcare applications across Oracle, SQL Server, and MySQL.

Halıcı Informatics & Software Co.

Software Production Director → Project Manager → .NET Developer | 2004 – 2008

- Built the Halsoft Portal/CMS and e-Learning platform serving government and education clients including UNHCR Turkey, Ministry of Education, and Ankara University distance learning.

METU (Various Roles) - Web Developer, Software Developer | 2000 – 2004

KEY PROJECTS

Jengai AI Estimation Suite — Jengai LLC | SaaS Platform

- Cloud-native SaaS for construction estimation with AI-powered PDF processing. .NET 9, Angular 20, Azure (AD B2C, Document Intelligence, Computer Vision), Docker. Integrated Salesforce, Zoho CRM, Autodesk, MS Graph API.
- Impact: Automated document review that previously took hours per project; enabled real-time multi-team collaboration across estimation workflows.

ProEmpower DM4ALL — ERC Group & EU Consortium | Diabetes Management Platform

- Multi-national EU healthcare platform for diabetes self-management deployed in 4 countries. ASP.NET MVC/Web API, AngularJS, TypeScript. Led integration with national eHealth infrastructures via AHIN middleware.
- Impact: Successfully deployed in production healthcare environments across Turkey, Italy, Spain, and Portugal, enabling personalized chronic disease management at national scale.

Avicenna PDFW Web Framework — DataSel / ERC Group | Enterprise Development Framework

- Full-stack modular framework unifying web and mobile enterprise app development. .NET Core, ASP.NET MVC/Web API, EF Core, AngularJS, Bootstrap, Docker. Features: dynamic grids/forms, auth module, notification system, schema serializer.
- Impact: Became the foundation for 10+ enterprise products; reduced new project bootstrap time from weeks to days.

Avicenna Telemedicine Platform (ATTP) — ERC Group | Telemedicine

- End-to-end telemedicine system: order management, real-time ECG monitoring, medical report delivery, inventory, supply chain, and security modules. ASP.NET MVC, AngularJS, TypeScript, SQL Server.
- Impact: Core platform extended into Lifewatch (international, 5-country partnership with USA/Switzerland/Israel) and multiple derivative products.

Avicenna Case-Mix / VKBS — DataSel | DRG Costing System — Ministry of Health, Turkey

- Complete DRG costing solution: clinical data collection, DRG grouper integration, cost calculation, and national reporting. Silverlight, WCF, RIA, EF, SQL Server.
- Impact: Deployed across 80+ hospitals; analyzed 50M+ clinical/financial records; produced Turkey's first official DRG costs and weighted values. Finalist — XI. Technology Awards (TUBITAK, TUSIAD, TTGV, 2014).

Fonet Framework & Fonet Studio — Fonet Software | RAD Framework + Visual IDE

- Enterprise RAD framework with DataGrid, DataForm, data binding, multi-DB support (Oracle, SQL Server, MySQL), and a drag-and-drop visual form designer IDE with runtime rendering. .NET, ADO.NET, C#, PL/SQL, T-SQL.
- Impact: Standardized development across the company's healthcare product line; enabled non-developers to create data-entry screens via the visual designer.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, Java, SQL (T-SQL, PL/SQL), VB.NET

Backend: .NET, ASP.NET, Web API, Entity Framework, SignalR, Node.js, Rest, gRPC, WCF

Frontend: Angular, TypeScript, Javascript, HTML5, CSS3, Sass, Bootstrap, Kendo UI

Cloud & DevOps: Azure (AD B2C, Blob, Document Intelligence, DevOps etc.), AWS, Docker, Docker Compose, Jenkins, Nginx, IIS

Databases: SQL Server, Oracle, MySQL, PostgreSQL, MongoDB, Redis

Architecture: Microservices, SOA, REST, OAuth2/JWT, Repository Pattern, MVVM, Dependency Injection, SOLID

Mobile: Ionic, Flutter, Apache Cordova, Xamarin

Tools: Git, GitHub/GitLab, Visual Studio, VS Code, Postman, Swagger/NSwag, Serilog, Grafana, Prometheus

EDUCATION

M.Sc. — Computer Education & Instructional Technologies - Middle East Technical University (METU), Ankara | 2004 – 2007

GPA: 3.68/4.00

Graduate Coursework — Software Management - Middle East Technical University (METU), Ankara | 2012 – 2013

GPA: AA

B.Sc. — Computer Education & Instructional Technologies - Middle East Technical University (METU), Ankara | 1999 – 2004

GPA: 3.80/4.00
